

Ahmed Elsaied Elminshawy

Frontend Developer | React.js & Next.js Specialist

(+20) 128-655-2467 | ahmedelminshawy981@gmail.com | Cairo, Egypt | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Frontend Developer with 3+ years of experience architecting and shipping high-performance, scalable web applications serving real users across 3 countries. Specialized in React.js and Next.js ecosystems with a proven track record delivering enterprise solutions including ERP, POS, LMS, and multilingual e-commerce platforms. Key impact: decreased page load times by 30% via SSR and code-splitting, increased mobile engagement by 60% through mobile-first architecture, and integrated payment gateways (Stripe, Paymob, Banque Misr) handling live transactions.

SKILLS

Technical Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks: React.js 18/19, Next.js 14+ (App Router)
Styling: Tailwind CSS, Sass, MUI, Bootstrap, WCAG 2.1
State & APIs: Redux Toolkit, React Query, Zustand, Axios
Performance: Core Web Vitals, SSR, SSG, Lazy Loading, Jest
Animations: GSAP, Framer Motion, Three.js
DevOps: Git, GitFlow, ESLint, Prettier, Husky, CI/CD
Specialized: i18next (RTL/LTR), Stripe, Paymob, IndexedDB, SEO

Soft Skills

- Cross-functional Team Collaboration
- Problem Solving & Analytical Thinking
- Agile / Scrum Methodology
- Attention to Detail & Code Quality
- Time Management & Meeting Deadlines
- Technical Documentation Writing
- Mentoring Junior Developers
- Quick Learner & Self-Motivated

WORK EXPERIENCE

Frontend Developer | [Branmarks](#) - Cairo, Egypt

Jun 2023 – Mar 2025

- Architected enterprise POS and business management solutions using Next.js 14 and React.js, adopted by 3+ enterprise clients.
- Decreased page load performance by 30% through SSR, dynamic imports, code splitting, and lazy loading — measured via Lighthouse and Core Web Vitals.
- Built a reusable component library (40+ components) that lowered feature development time by 25% across multiple projects.
- Integrated RESTful APIs across complex enterprise workflows covering inventory, invoicing, and attendance systems.
- Enforced CI/CD-friendly code standards (ESLint, Prettier, Husky) and maintained GitFlow branching strategy across the team.

Frontend Developer — Freelance | [Nosdaq](#) - Remote

Nov 2023 – Jan 2025

- Launched 2 large-scale international e-commerce platforms (Moscow & Paris) with full RTL/LTR multilingual support (Arabic, English, Russian).
- Drove a 60% increase in mobile user engagement through mobile-first responsive design with optimized touch interactions.
- Integrated 3 payment gateways (Stripe, Paymob, Banque Misr) enabling seamless checkout flows across multiple regions.
- Applied GSAP and Framer Motion animations that improved engagement metrics and lessened bounce rate on product pages.

Frontend Engineering Intern | [Innomatics](#) - Remote

Jan 2022 – Jun 2022

- Completed training in React.js performance optimization, component architecture, and modern web development standards.

- Built and deployed 4 projects applying best practices in state management, accessibility (WCAG 2.1), and responsive design.

Frontend Development Intern | IEEE Training - Egypt

Jul 2022 – Sep 2022

- Gained practical experience with semantic HTML5, CSS3, and WCAG accessibility standards.
- Collaborated in Agile/Scrum workflows using Git and GitHub — contributed to 3+ team projects with zero merge conflicts across sprints.

KEY PROJECTS

MIED Platform — Enterprise Multi-National Platform

Oct 2024 – Feb 2025

- Built a multi-language enterprise platform (Arabic, English, French) serving 500+ registered users across 3 countries.
- Integrated Banque Misr, Stripe, and Paymob with full subscription lifecycle management and automated renewal flows.
- Engineered PDF report generation and interactive dashboards — achieving a 90+ Lighthouse performance score.
- Enforced global state with Redux Toolkit, cutting re-renders by ~35% via memoization and selector optimization.

Tech: React.js, Next.js 14, Redux Toolkit, Tailwind CSS, i18next, jsPDF, Payment APIs

Mizzuu Travel Platform — Real-Time Booking System

Jun 2024 – Aug 2024

- Architected a real-time booking system handling trains, flights, hotels, and tours — processing 200+ daily queries via live APIs.
- Built dynamic search with debounced inputs, lowering unnecessary API calls by 40%.
- Provided full multilingual interface (Arabic, English, Russian) with RTL support, increasing international user retention.

Tech: React.js, JavaScript ES6+, Tailwind CSS, i18n, TanStack Query, Travel APIs

Gharam Financial ERP — Enterprise Finance & Inventory

Sep 2023 – Jan 2024

- Built an Offline-First ERP using Dexie.js (IndexedDB) — enabling full functionality with zero network dependency for field teams.
- Designed a data table system handling 10,000+ records with virtualized rendering and multi-format export (Excel, PDF).
- Produced real-time financial dashboards covering invoicing, attendance, and expense tracking for 50+ users.

Tech: React 18, Dexie.js, MUI DataTables, Redux Toolkit, Tailwind CSS, JSS-RTL

M&R Elite Store — Full-Featured E-Commerce

Jan 2024 – Mar 2024

- Presented a complete e-commerce solution with cart management, filtering, and RTL/LTR multilingual support.
- Executed an advanced GSAP animation system for product reveals, contributing to a 25% lower bounce rate.
- Achieved 95+ Google PageSpeed via image lazy loading, font optimization, and component-level code splitting.

Tech: React.js 18, Redux Toolkit, i18next, GSAP, Tailwind CSS, SASS

Smart POS System — Retail Management

Feb 2024 – Mar 2024

- Built a real-time POS with live inventory tracking, multi-format export (XLSX, CSV, PDF), and keyboard shortcuts for cashiers.
- Applied Formik + Yup validation and React-to-Print for receipt generation — cutting checkout errors by 80%.

Tech: React 18, Material UI, Ant Design, XLSX & CSV Export, Formik & Yup, React-to-Print

PS Manager — Offline Desktop POS & Session Management

2024 – 2025

- Built a fully offline-first desktop application using Tauri (Rust) and React.js for managing PlayStation gaming sessions, device timers, billing, and POS sales — with zero network dependency.
- Architected a full management suite: real-time session timers with auto-billing, product inventory with low-stock alerts, HR module (staff attendance, shifts, payroll), and printable invoices and reports.
- Leveraged Zustand for global state management across 8 modules (Dashboard, Devices, Sessions, POS, Inventory, HR, Reports, Settings), delivering a seamless single-app experience with no backend required.

Tech: Tauri (Rust), React.js 18, Zustand, Tailwind CSS, Vite, IndexedDB, React-to-Print

Restaurant Management System — Offline-First Desktop App

2025

- Developed a cross-platform offline desktop application using Tauri (Rust) for full restaurant operations management including table orders, kitchen workflows, and billing.
- Implemented modules for menu management, inventory depletion tracking, staff shifts, daily revenue summaries, and printable receipts — all functioning without an internet connection.

Tech: *Tauri (Rust), React.js 18, Zustand, Tailwind CSS, Vite, IndexedDB, React-to-Print*

Retail Store Accounting System — Offline Desktop ERP

2025

- Built an offline-first retail accounting desktop app using Tauri (Rust), handling product inventory, purchase and sales invoicing, expense tracking, and profit/loss reporting.
- Delivered multi-format financial exports (Excel, PDF), supplier and customer ledgers, and real-time dashboards — designed for small-to-medium retail businesses with no infrastructure requirements.

Tech: *Tauri (Rust), React.js 18, Zustand, Tailwind CSS, Vite, IndexedDB, XLSX Export, jsPDF*

EDUCATION

Bachelor of Computer Science — Information Systems

2020 – 2024

Kafr El-Sheikh University (KFU) | GPA: 3.5 / 4.0 — Graduated with Honors

- Specialized in Software Engineering and Web Technologies.

CERTIFICATIONS

- Meta Front-End Professional Certificate — Coursera / Meta (2023)
- Advanced React Patterns — Udemy Professional Certification (2023)
- Google UX Design Specialization — Google Professional Certificate (2023)
- Front-End Development Training — IEEE (2022)

LANGUAGES

Arabic: Native **English:** Professional Working Proficiency (Spoken & Written)
